

# High Voltage MPPT Solar Charge Controller

**Battery bank voltage: 48V to 240V  
Charging / Load current: 50A**

- High Voltage MPPT charge controller for higher Solar panel array voltage
- Can be connected to Maximum Solar Panel  $V_{oc}$  = 750V DC
- Available for battery bank voltage from 48V to 240V
- Maximum battery charging current of 50A
- Can supply full 50A to load while limiting battery charging current to 15A (User settable)
- Inverter battery cable connects directly to charge controller DC load terminals
- 160 character LCD display with multiple user settable parameters
